

WHEN: Tuesday, October 10 at 5:45 pm

PURPOSE: Continue working on Software Requirements Specifications

ATTENDANCE: William Hedges, William Johnson, Eric Loseke

Meeting notes taken by Eric Loseke

Note: Between the last meeting and this meeting, Eric rewrote the functional requirements.

Manish and Achinth could not make the meeting due to other obligations.

William Hedges completed the unfinished portions of the Software Requirements Specifications document and Eric revised what William Hedges wrote.

William Johnson worked on the C++ code for the project and started to implement a stack to handle the order of operations on the calculator. His code can handle parentheses, but not PEMDAS rules.

We finished the Software Requirements Specifications document and will let Manish do final revisions on the document and submit the document.
