

**WHEN:** Tuesday, November 7 at 5:50 pm

**PURPOSE:** Discuss software architecture

**ATTENDANCE:** William Hedges, Eric Loseke, Achinth Ulagapperoli, William Johnson, Manish Singh (all members present)

Meeting notes taken by Eric Loseke

William Hedges and Eric Loseke's EECS 210 discussion ended an hour earlier than expected, so they began the meeting at 5 pm.

Eric reuploaded all meeting notes on GitHub as PDF files, as per the request of our grader from our Software Requirements Specification feedback.

William Hedges drafted the architectural representation, logical view, and interface description sections of the software architecture document.

Eric reviewed and edited William Hedges' draft.

Achinth drafted the overview section of the introduction.

William Hedges and Manish edited the software architecture document so that it matched the structure of the code William Johnson implemented.
